

Amendments to the Claims:

This listing of the claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1 (Currently Amended): An insert mold structure comprising:
a first part ~~constituted from a thermoplastic material~~ made of polyethylene;
a second part made of a material selected from the group of metals and resins having a lower permeation characteristic for gasoline than polyethylene coated with a ~~paint~~ coating made of the same material as the first part polyethylene, the second part being insert-molded in the first part; and

~~the second part insert molded in the first part~~ an adhesive layer between the first part and the second part, the adhesive layer being formed from the coating while the second part is insert molded in the first part.

2 (Original): An insert mold structure according to claim 1, wherein the coating is powder coating.

3 (original): An insert mold structure according to claim 1, wherein the coated second part is heat-treated.

4-9 (Cancelled)

10 (Previously Presented): An insert mold structure according to claim 1, wherein the melting point of the coating is lower than the melting point of the second part.

11-20 (Cancelled)

21 (Currently Amended): An insert mold structure comprising:

a first part consisting essentially of ~~a thermoplastic material~~; and polyethylene;

a second part consisting essentially of a material selected from the group of metals and resins having a lower permeation characteristic for gasoline than polyethylene coated with a coating, the coating including ~~the thermoplastic material~~ polyethylene, the first part and the second part being insert-molded; and

an adhesive layer between the first part and the second part, the adhesive layer being formed from the coating while the first part and the second part are insert-molded.

22 (Cancelled)

23 (Previously Presented): An insert mold structure according to claim 21, wherein the second part and the coating are heat-treated.

24 (Cancelled)

25 (Previously Presented): An insert mold structure according to claim 21, wherein the melting point of the coating is lower than the melting point of the second part.
